

## Marine Conservationist

Working with non-profit organisations, government agencies, or research institutions to protect and conserve marine ecosystems, endangered species, and biodiversity

## Aquaculture Manager

Overseeing sustainable aquaculture operations, including fish farming, shellfish cultivation, and seaweed farming, to meet growing demand for seafood while minimising environmental impacts

## Fisheries Manager

Managing fisheries resources sustainably, overseeing fishing quotas, enforcing regulations, and implementing conservation measures to ensure the long-term viability of fish stocks

## Marine Ecotourism Manager

Managing marine ecotourism operations, including wildlife tours, diving excursions, and eco-friendly accommodations, while minimising the environmental impact and promoting conservation awareness

## Environmental Consultant

Providing consulting services to businesses, governments, and NGOs on environmental issues related to the marine environment, such as pollution prevention, habitat restoration, and environmental impact assessments

## Coastal Planner

Collaborating with government agencies, urban planners, and communities to develop sustainable coastal development plans that balance economic development with environmental conservation and social equity

## Marine Resource Economist

Conducting economic analyses of marine resource utilisation, evaluating the costs and benefits of different management strategies, and informing decision-makers about the economic value of marine ecosystems

## Oceanographer

Studying physical, chemical, and biological processes in the ocean, conducting research on climate change, ocean circulation, and marine biodiversity, and contributing to our understanding of marine ecosystems and their resilience to environmental stressors

## Blue Innovation Entrepreneur

Launching startups or innovative projects that address challenges in the sustainable blue economy, such as developing new technologies for marine conservation, aquaculture, ocean monitoring, or waste management

## Renewable Energy Specialist

Researching and developing renewable energy technologies such as offshore wind, tidal energy, and wave energy, to harness the power of the ocean while minimising environmental impacts
